Thin Solid Films 331 (1998) 315–320

thin solid films

Subject Index of Volume 331

Absorption spectra
Oriented thin films of conjugated polymers: polysilanes and polyphenylenes, 229
Adhesive force
Measurements of adhesive forces on a polytetrafluoroethylene (PTFE) film and glass surface by mapping force curve, 176
Alkanes
STM studies on nanoscopic structures and electric characteristics of alkanethiol and alkanedithiol self-assembled monolayers, 210
Applying a bias voltage
Structures and electrical properties of arachidic acid Langmuir–Blodgett films with cyanine dyes prepared by applying bias voltages, 32
Arachidic acid LB film
Structures and electrical properties of arachidic acid Langmuir–Blodgett films with cyanine dyes prepared by applying bias voltages, 32
Aryl ether azodendrimers
A new approach to light-harvesting with dendritic antenna, 254
Atomic force microscopy
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Initial states of epitaxial growth of vanadyl- and titanyl-phthalocyanines on MoS_2 cleaved surfaces, 148
Measurements of adhesive forces on a polytetrafluoroethylene (PTFE) film and glass surface by mapping force curve, 176
Molecular nanostructures and their electrical probing, 1
Molecular-scale structures of Langmuir–Blodgett films of fatty acids observed by atomic force microscopy (II) – cation dependence, 170
Studying the surface of soft materials (live cells) at high resolution by scanning probe microscopy: challenges faced, 194
Attenuated total reflection
Real-time observation of the dielectric constant variation of evaporated polydiacetylene films during photopolymerization and photochromic transitions, 39
Azobenzene
Molecular switching in phospholipid-azobenzene mixed monolayers by photoisomerization, 239
Azobenzene chromophore
Second harmonic generation of dipolar dendrons in the assembled thin films, 248
Biotin
Molecular nanostructures and their electrical probing, 1
Blind alleys
Photocurrent multiplication phenomena at organic/metal and organic/organic interfaces, 71
C_{22}-quinolinium(TCNQ)
Electrical properties of C_{22}-quinolinium(TCNQ) and polyamic acid alkylamine salts Langmuir–Blodgett films, 8
C_{60}
Annealing effect for La_xC_{60} thin films, 113
Cadmium selenide (CdSe)
Optical Kerr effect measurements for organic multilayered structures, 309
Calixarenes
Electrochemical recognition and immobilization of uranyl ions by polypyrrole film doped with calix[6]arene, 272
Carbocyanine dye
Development of a single molecule optical probe, 189
Carbon nanotubes
Density of states and tunneling spectroscopy on molecular nanostructures, 45
Cathode
Effect of Al/LiF Cathodes on emission efficiency of organic EL devices, 96
Cells
Studying the surface of soft materials (live cells) at high resolution by scanning probe microscopy: challenges faced, 194
Charge injection
Fluorescence quenching induced by injected carriers in organic thin films, 152
Chemical tomography
Direct structural observation of liquid molecules in single picoliter microdroplets using near-infrared Raman microprobe spectroscopy combined with laser trapping and chemical-tomographic imaging techniques, 181
Coercive force
Grain size of a hard molecule-based-magnet of manganese porphyrin-tetracyanoethylene charge transfer salt, 165
Conducting polymers
Electrochemical recognition and immobilization of uranyl ions by polypyrrole film doped with calix[6]arene, 272
π-Conjugated material
Device characteristics and its operation mechanism of a FET-type waveguide modulator using α-sexithienyl, 55
Conjugated polymers
Oriented thin films of conjugated polymers: polysilanes and polyphenylenes, 229
Photoinduced charge separation in photovoltaic cell with heterojunction of p- and n-type conjugated polymers, 76
Continuum theory
Unified surface anchoring energy of a nematic liquid crystal slab: surface-induced optical switching and director distribution, 25
Copper phthalocyanine
Schottky gate static induction transistor using copper phthalocyanine films, 51
Crown ether
Structures of $Ni(dmit)_2$ salts of lithium or ammonium included in crown ether assemblies, 264
Crystal growth

0040-6090/98/$ - see front matter © 1998 Elsevier Science S.A. All rights reserved
PII S0040-6090(98)01440-0

Structure and crystal growth of low molecular weight polyethylene vapor-deposited on polymer friction-transferred layers, 216
Crystal structure
Structures of $Ni(dmit)_2$ salts of lithium or ammonium included in crown ether assemblies, 264
Cyanine dye
Structures and electrical properties of arachidic acid Langmuir–Blodgett films with cyanine dyes prepared by applying bias voltages, 32
Dendrimer
Enhanced luminescence of lanthanide within lanthanide-cored dendrimer complexes, 259
Dendritic antenna
A new approach to light-harvesting with dendritic antenna, 254
Dendron
Second harmonic generation of dipolar dendrons in the assembled thin films, 248
Density of state
Nano-electrostatic phenomena in Langmuir–Blodgett films, 15
Deuterated PMMA
Polymeric optical waveguides for optical interconnections, 303
Dielectric constant
Real-time observation of the dielectric constant variation of evaporated polydiacetylene films during photopolymerization and photochromic transitions, 39
Diffusion–adsorption LB method
Structures and electrical properties of arachidic acid Langmuir–Blodgett films with cyanine dyes prepared by applying bias voltages, 32
Director orientation
Unified surface anchoring energy of a nematic liquid crystal slab: surface-induced optical switching and director distribution, 25
Doped single wall carbon nanotubes
Raman spectroscopy of pristine and doped single wall carbon nanotubes, 141
Dye molecules
Organic electroluminescent device with R-G-B emission, 89
Electrical conductivity
Structures of $Ni(dmit)_2$ salts of lithium or ammonium included in crown ether assemblies, 264
Electrical properties
Electrical properties of C_{22}-quinolinium(TCNQ) and polyamic acid alkylamine salts Langmuir–Blodgett films, 8
Structures and electrical properties of arachidic acid Langmuir–Blodgett films with cyanine dyes prepared by applying bias voltages, 32
Electrical properties and measurement
STM studies on nanoscopic structures and electric characteristics of alkanethiol and alkanedithiol self-assembled monolayers, 210
Electroluminescence
Near-ultraviolet electroluminescence from polysilanes, 64
Effect of Al/LiF Cathodes on emission efficiency of organic EL devices, 96
Electro-luminescent device
Structure and orientation control of organopolysilanes and their application to electronic devices, 222
Electron energy loss spectroscopy
Initial states of epitaxial growth of vanadyl- and titanyl-phthalocyanines on MoS_2 cleaved surfaces, 148
Electronic state
Photoinduced charge separation in photovoltaic cell with heterojunction of p- and n-type conjugated polymers, 76
Electrostatic force microscopy
Molecular nanostructures and their electrical probing, 1
Electrostatic interactions
Molecular nanostructures and their electrical probing, 1
Electrostatic potential fluctuation
Transient photoconductivity study of localized-state distributions in metallophthalocyanines, 82
Epitaxial growth
Aggregation mechanism in fullerene thin films on several substrates, 131
Initial states of epitaxial growth of vanadyl- and titanyl-phthalocyanines on MoS_2 cleaved surfaces, 148
Epitaxy
Structure and crystal growth of low molecular weight polyethylene vapor-deposited on polymer friction-transferred layers, 216
Europium
Enhanced luminescence of lanthanide within lanthanide-cored dendrimer compiexes, 259
Ferrocene
Spin dependent tunneling in 80NiFe/LB film with ferrocene and tris(bipyridine)ruthenium derivatives/Co junctions, 158
Field effect transistor
Schottky gate static induction transistor using copper phthalocyanine films, 51
Fluorescence
Fluorescence quenching induced by injected carriers in organic thin films, 152
Force mapping
Measurements of adhesive forces on a polytetrafluoroethylene (PTFE) film and glass surface by mapping force curve, 176
Forty-five degree mirrors
Polymeric optical waveguides for optical interconnections, 303
Friction-transfer
Structure and crystal growth of low molecular weight polyethylene vapor-deposited on polymer friction-transferred layers, 216
Friction-transferred PTFE film
Measurements of adhesive forces on a polytetrafluoroethylene (PTFE) film and glass surface by mapping force curve, 176
Fullerene
Aggregation mechanism in fullerene thin films on several substrates, 131
Gap junctions
Studying the surface of soft materials (live cells) at high resolution by scanning probe microscopy: challenges faced, 194
Gold
STM studies on nanoscopic structures and electric characteristics of alkanethiol and alkanedithiol self-assembled monolayers, 210
Growth mechanism
Aggregation mechanism in fullerene thin films on several substrates, 131
Hard molecule-based magnet
Grain size of a hard molecule-based-magnet of manganese porphyrin-tetracyanoethylene charge transfer salt, 165

Heterojunction
Photoinduced charge separation in photovoltaic cell with heterojunction of p- and n-type conjugated polymers, 76
Immobilization
Electrochemical recognition and immobilization of uranyl ions by polypyrrole film doped with calix[6]arene, 272
Intercalation
Self-organization approach to organic/inorganic quantum-well based on metal halide-based layer perovskite, 285
Ionic radius
Lamellar mesophase
Photoconduction of a mesogenic long-chain tetraphenylporphyrin in a symmetrical sandwich-type cell, 279
Langmuir–Blodgett films
Electrical properties of C_{22}-quinolinium(TCNQ) and polyamic acid alkylamine salts Langmuir–Blodgett films, 8
Nano-electrostatic phenomena in Langmuir–Blodgett films, 15
Spin dependent tunneling in 80NiFe/LB film with ferrocene and tris(bipyridine)ruthenium derivatives/Co junctions, 158
Molecular-scale structures of Langmuir–Blodgett films of fatty acids observed by atomic force microscopy (II) – cation dependence, 170
Lanthanide
Enhanced luminescence of lanthanide within lanthanide-cored dendrimer complexes, 259
Laser oscillation
Morphology dependent resonant lasing of a dye-doped microsphere prepared by non-linear optical material, 298
Laser trap
Direct structural observation of liquid molecules in single picoliter microdroplets using near-infrared Raman microprobe spectroscopy combined with laser trapping and chemical-tomographic imaging techniques, 181
Layer-by-layer deposition
Annealing effect for La_xC_{60} thin films, 113
Layered perovskite
Self-organization approach to organic/inorganic quantum-well based on metal halide-based layer perovskite, 285
LiF
Effect of Al/LiF Cathodes on emission efficiency of organic EL devices, 96
Light emitting devices
Light emitting devices using vacuum deposited organic thin films, 101
Light harvesting
A new approach to light-harvesting with dendritic antenna, 254
Light source
Development of a single molecule optical probe, 189
Lipid molecular switching
Molecular switching in phospholipid-azobenzene mixed monolayers by photoisomerization, 239
Liquid crystal
Unified surface anchoring energy of a nematic liquid crystal slab: surface-induced optical switching and director distribution, 25
Photoconduction of a mesogenic long-chain tetraphenylporphyrin in a symmetrical sandwich-type cell, 279
Localized-state distributions
Transient photoconductivity study of localized-state distributions in metallophthalocyanines, 82
Luminescence
Enhanced luminescence of lanthanide within lanthanide-cored dendrimer complexes, 259
Magnetic domain
Grain size of a hard molecule-based-magnet of manganese porphyrin-tetracyanoethylene charge transfer salt, 165
Magnetization
Spin dependent tunneling in 80NiFe/LB film with ferrocene and tris(bipyridine)ruthenium derivatives/Co junctions, 158
Magnetocrystalline anisotropy
Grain size of a hard molecule-based-magnet of manganese porphyrin-tetracyanoethylene charge transfer salt, 165
Maxwell displacement current
Molecular switching in phospholipid-azobenzene mixed monolayers by photoisomerization, 239
Metallophthalocyanines
Transient photoconductivity study of localized-state distributions in metallophthalocyanines, 82
Metamagnetism
Grain size of a hard molecule-based-magnet of manganese porphyrin-tetracyanoethylene charge transfer salt, 165
Microparticle
Morphology dependent resonant lasing of a dye-doped microsphere prepared by non-linear optical material, 298
MnTPP-TCNE
Grain size of a hard molecule-based-magnet of manganese porphyrin-tetracyanoethylene charge transfer salt, 165
Mobile ion
Structures and electrical properties of arachidic acid Langmuir–Blodgett films with cyanine dyes prepared by applying bias voltages, 32
Molecular arrangement
Molecular-scale structures of Langmuir–Blodgett films of fatty acids observed by atomic force microscopy (II) – cation dependence, 170
Molecular beam deposition (MBD)
Optical Kerr effect measurements for organic multilayered structures, 309
Molecular electronics
Density of states and tunneling spectroscopy on molecular nanostructures, 45
Molecular electronics
Molecular nanostructures and their electrical probing, 1
Molecular mechanics calculation
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Molecular order
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Molecular orientation
Second harmonic generation of dipolar dendrons in the assembled thin films, 248
Molecular rectifier
Density of states and tunneling spectroscopy on molecular nanostructures, 45
Molecular semiconductor
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Molecular structure

Structure and orientation control of organopolysilanes and their application to electronic devices, 222
Monolayers
STM studies on nanoscopic structures and electric characteristics of alkanethiol and alkanedithiol self-assembled monolayers, 210
Morphology-dependant resonance
Morphology dependent resonant lasing of a dye-doped microsphere prepared by non-linear optical material, 298
MT connectors
Polymeric optical waveguides for optical interconnections, 303
Multicolor emitting diodes
Organic electroluminescent device with R-G-B emission, 89
Multilayer structure
Organic electroluminescent device with R-G-B emission, 89
Multilayered structure
Optical Kerr effect measurements for organic multilayered structures, 309
Nano-electrostatic phenomena
Nano-electrostatic phenomena in Langmuir–Blodgett films, 15
Near-field optics
Development of a single molecule optical probe, 189
Near-field optics
Fluorescence quenching induced by injected carriers in organic thin films, 152
Near-infrared Raman microprobe spectroscopy
Direct structural observation of liquid molecules in single picoliter microdroplets using near-infrared Raman microprobe spectroscopy combined with laser trapping and chemical-tomographic imaging techniques, 181
$Ni(dmit)_2$ complex
Structures of $Ni(dmit)_2$ salts of lithium or ammonium included in crown ether assemblies, 264
Non-linear integrated optics
Thin film devices for all-optical switching and processing via quadratic non-linearities, 291
Non-linear optical effect
Morphology dependent resonant lasing of a dye-doped microsphere prepared by non-linear optical material, 298
Optical interconnection
Polymeric optical waveguides for optical interconnections, 303
Optical Kerr effect
Optical Kerr effect measurements for organic multilayered structures, 309
Optical modulator
Device characteristics and its operation mechanism of a FET-type waveguide modulator using α-sexithienyl, 55
Optical waveguide
Device characteristics and its operation mechanism of a FET-type waveguide modulator using α-sexithienyl, 55
Organic EL
Effect of Al/LiF Cathodes on emission efficiency of organic EL devices, 96
Organic electroluminescence device
Vapor-deposited poly(*N*-vinylcarbazole) films for hole transport layer in organic electroluminescent devices, 106
Organic electroluminescent diodes
Organic electroluminescent device with R-G-B emission, 89
Organic field-effect transistor
Device characteristics and its operation mechanism of a FET-type waveguide modulator using α-sexithienyl, 55
Organic films
Fluorescence quenching induced by injected carriers in organic thin films, 152
Organic molecular beam deposition
Aggregation mechanism in fullerene thin films on several substrates, 131
Organic molecular beam epitaxy
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Organic/inorganic composite
Self-organization approach to organic/inorganic quantum-well based on metal halide-based layer perovskite, 285
Organic/inorganic multilayers
Optical Kerr effect measurements for organic multilayered structures, 309
Organic/metal interface
Photocurrent multiplication phenomena at organic/metal and organic/organic interfaces, 71
Organic/organic interface
Photocurrent multiplication phenomena at organic/metal and organic/organic interfaces, 71
Organopolysilane
Structure and orientation control of organopolysilanes and their application to electronic devices, 222
Orientation
Oriented thin films of conjugated polymers: polysilanes and polyphenylenes, 229
pH
Molecular-scale structures of Langmuir–Blodgett films of fatty acids observed by atomic force microscopy (II) – cation dependence, 170
Photochromizm
Real-time observation of the dielectric constant variation of evaporated polydiacetylene films during photopolymerization and photochromic transitions, 39
Photoconductivity
Photoconduction of a mesogenic long-chain tetraphenylporphyrin in a symmetrical sandwich-type cell, 279
Photocurrent multiplication phenomena
Photocurrent multiplication phenomena at organic/metal and organic/organic interfaces, 71
Photoinduced charge separation
Photoinduced charge separation in photovoltaic cell with heterojunction of p- and n-type conjugated polymers, 76
Photopolymerization
Real-time observation of the dielectric constant variation of evaporated polydiacetylene films during photopolymerization and photochromic transitions, 39
Photovoltaic cell
Photoinduced charge separation in photovoltaic cell with heterojunction of p- and n-type conjugated polymers, 76
Phthalocyanato tin(IV) dichloride ($SnCl_2Pc$)
Optical Kerr effect measurements for organic multilayered structures, 309
Phthalocyanine
Initial states of epitaxial growth of vanadyl- and titanyl-phthalocyanines on MoS_2 cleaved surfaces, 148
PMMA film
Development of a single molecule optical probe, 189
Polaron

Device characteristics and its operation mechanism of a FET-type waveguide modulator using α-sexithienyl, 55
Poly(di-hexyl silane)
Structure and orientation control of organopolysilanes and their application to electronic devices, 222
Poly(di-methyl silane)
Structure and orientation control of organopolysilanes and their application to electronic devices, 222
Polyamic acid alkylamine salts
Electrical properties of C_{22}-quinolinium(TCNQ) and polyamic acid alkylamine salts Langmuir–Blodgett films, 8
Polydiacetylene
Real-time observation of the dielectric constant variation of evaporated polydiacetylene films during photopolymerization and photochromic transitions, 39
Polyethylene
Structure and crystal growth of low molecular weight polyethylene vapor-deposited on polymer friction-transferred layers, 216
Polymer light-emitting diodes
Near-ultraviolet electroluminescence from polysilanes, 64
Polymeric optical waveguide film
Polymeric optical waveguides for optical interconnections, 303
Polyphenylenes
Oriented thin films of conjugated polymers: polysilanes and polyphenylenes, 229
Polypyrrole
Electrochemical recognition and immobilization of uranyl ions by polypyrrole film doped with calix[6]arene, 272
Polysilane derivatives
Morphology dependent resonant lasing of a dye-doped microsphere prepared by non-linear optical material, 298
Polysilane
Structure and orientation control of organopolysilanes and their application to electronic devices, 222
Polysilanes
Near-ultraviolet electroluminescence from polysilanes, 64
Polysilanes
Oriented thin films of conjugated polymers: polysilanes and polyphenylenes, 229
Polyvinylcarbazole
Vapor-deposited poly(*N*-vinylcarbazole) films for hole transport layer in organic electroluminescent devices, 106
Probe structure
Studying the surface of soft materials (live cells) at high resolution by scanning probe microscopy: challenges faced, 194
Quadratic non-linearity
Thin film devices for all-optical switching and processing via quadratic non-linearities, 291
Quantum confinement
Raman spectroscopy of pristine and doped single wall carbon nanotubes, 141
Quantum-well
Self-organization approach to organic/inorganic quantum-well based on metal halide-based layer perovskite, 285
Quenching
Fluorescence quenching induced by injected carriers in organic thin films, 152
Raman scattering
Raman spectroscopy of pristine and doped single wall carbon nanotubes, 141
Recognition
Electrochemical recognition and immobilization of uranyl ions by polypyrrole film doped with calix[6]arene, 272
Reflection high energy electron diffraction
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Ruthenium complex
Spin dependent tunneling in 80NiFe/LB film with ferrocene and tris(bipyridine)ruthenium derivatives/Co junctions, 158
Scanning probe
Development of a single molecule optical probe, 189
Scanning tunneling microscopy
STM studies on nanoscopic structures and electric characteristics of alkanethiol and alkanedithiol self-assembled monolayers, 210
Scanning tunneling spectroscopy
Density of states and tunneling spectroscopy on molecular nanostructures, 45
Schottky gate electrode
Schottky gate static induction transistor using copper phthalocyanine films, 51
Second harmonic generation
Second harmonic generation of dipolar dendrons in the assembled thin films, 248
Thin film devices for all-optical switching and processing via quadratic non-linearities, 291
Self-assembly
Enhanced luminescence of lanthanide within lanthanide-cored dendrimer complexes, 259
Self-organization
Self-organization approach to organic/inorganic quantum-well based on metal halide-based layer perovskite, 285
α-sexithienyl
Device characteristics and its operation mechanism of a FET-type waveguide modulator using α-sexithienyl, 55
Single microdroplet
Direct structural observation of liquid molecules in single picoliter microdroplets using near-infrared Raman microprobe spectroscopy combined with laser trapping and chemical-tomographic imaging techniques, 181
Single molecules
Development of a single molecule optical probe, 189
Single wall carbon nanotubes
Raman spectroscopy of pristine and doped single wall carbon nanotubes, 141
Space charge
Nano-electrostatic phenomena in Langmuir–Blodgett films, 15
Static induction transistor
Schottky gate static induction transistor using copper phthalocyanine films, 51
Streptavidin
Molecular nanostructures and their electrical probing, 1
Structural trap
Photocurrent multiplication phenomena at organic/metal and organic/organic interfaces, 71
Substituted phthalocyanine
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Superstructure

Molecular-scale structures of Langmuir–Blodgett films of fatty acids observed by atomic force microscopy (II) – cation dependence, 170
Superstructured molecule
Second harmonic generation of dipolar dendrons in the assembled thin films, 248
Supramolecular cation
Structures of $Ni(dmit)_2$ salts of lithium or ammonium included in crown ether assemblies, 264
Surface energy
Unified surface anchoring energy of a nematic liquid crystal slab: surface-induced optical switching and director distribution, 25
Surface potential
Nano-electrostatic phenomena in Langmuir–Blodgett films, 15
Terbium
Enhanced luminescence of lanthanide within lanthanide-cored dendrimer complexes, 259
Tetraphenylporphyrin
Photoconduction of a mesogenic long-chain tetraphenylporphyrin in a symmetrical sandwich-type cell, 279
Thermally stimulated current
Molecular switching in phospholipid-azobenzene mixed monolayers by photoisomerization, 239
Thermally-stimulated currents
Electrical properties of C_{22}-quinolinium(TCNQ) and polyamic acid alkylamine salts Langmuir–Blodgett films, 8
Thin Film
Aggregation mechanism in fullerene thin films on several substrates, 131
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Three-dimensional imaging
Direct structural observation of liquid molecules in single picoliter microdroplets using near-infrared Raman microprobe spectroscopy combined with laser trapping and chemical-tomographic imaging techniques, 181
Transient photoconductivity
Transient photoconductivity study of localized-state distributions in metallophthalocyanines, 82
Tunneling magnetoresistive effect
Spin dependent tunneling in 80NiFe/LB film with ferrocene and tris(bipyridine)ruthenium derivatives/Co junctions, 158
Tunneling
Photocurrent multiplication phenomena at organic/metal and organic/organic interfaces, 71
Ultraviolet light source
Near-ultraviolet electroluminescence from polysilanes, 64
Uranyl ion
Electrochemical recognition and immobilization of uranyl ions by polypyrrole film doped with calix[6]arene, 272
UV curable epoxy resin
Polymeric optical waveguides for optical interconnections, 303
UV-vis absorption spectroscopy
Organic molecular beam epitaxial growth of substituted phthalocyanine thin films – tetrapyridotetraazaporhyrins on alkali halide (100) surfaces, 117
Vacuum evaporation
Schottky gate static induction transistor using copper phthalocyanine films, 51
Vacuum-deposited organic thin films
Light emitting devices using vacuum deposited organic thin films, 101
Vapor deposition
Vapor-deposited poly(*N*-vinylcarbazole) films for hole transport layer in organic electroluminescent devices, 106
